The stories in this book are the fruit of a vision that took root more than four decades ago. When Ron and Marianne Frase came to Whitworth College back in 1973, they had the dream that Whitworth students could travel to Latin America and learn many truths through deep experiential learning. This would take place through listening to, living among, and loving our Latino

neighbors. The chapters are filled with stories of growth and change. Some are fun and comical. Others are painful encounters with difficult lessons. Time and time again, the resiliency and faith of Central Americans emerge and inspire. The vignettes are windows into discovering how lessons learned in Central America shaped students' lives years after their graduation. Additionally, Whitworth itself became a better academic institution, more willing to take on the tough academic, social, and political contemporary challenges so that its students could genuinely become well-equipped global citizens and servants of Christ.

Including reflective/discussion tasks and example lesson plans Learning to Plan Modern Languages Lessons is a must-read book for beginning and more experienced teachers of any modern language. This book argues that narrative literature very often, if not always, include significant amounts of what appears to be extra-literary material - in form and in content - and that we too often ignore this dimension of

literature. It offers an up to date overview and discussion of intermedial theory, and it facilitates a much-needed dialogue between the burgeoning field of intermedial studies on the one side and the already well-developed methods of literary analysis on the other. The book aims at working these two fields together into a productive working method. It makes evident, in a methodologically

Acces PDF Why Learn Spanish Powerpoint

succinct way, the necessity of approaching literature with an intermedial terminology by way of a relatively simple but never the less productive three-step analytic method. In four in-depth case studies of Anglophone texts ranging from Nabokov, Chandler and Tobias Wolff to Jennifer Egan, it demonstrates that medialities matter. The current thrust in the field of education is to improve teachers' understanding of how

research on best practices can improve student learning. The field of world language education introduces a double, perhaps a triple, bind: teachers must be able to design and deliver instruction that aligns with national expectations for developing students' language and intercultural abilities for success in the global workplace, yet in schools across America, all K-12 students do not have the opportunity to

study languages, even though research supports their astonishing facility for acquisition. Schools and teachers without resources, including time to investigate and implement evidence-based best practices, are ultimately held accountable for student performance. If world language teachers are to advocate for languages, they must use their expertise and share evidence of their students' progress. The
