A reliable and focused treatment of the emergent technology of fifth generation (5G) networks This book provides an understanding of the most recent developments in 5G, from both theoretical and industrial perspectives. It identifies and discusses technical challenges and recent results related to improving capacity and spectral efficiency on the radio interface side, and operations management on the core network side. It covers both existing network technologies and those currently in development in three major areas of 5G: spectrum extension, spatial spectrum utilization, and core network and network topology management. It explores new spectrum opportunities; the capability of radio access technology; and the operation of network infrastructure and heterogeneous QoE provisioning. 5G Networks: Fundamental Requirements, Enabling Technologies, and Operations Management is split into five sections: Physical Layer for 5G Radio Interface Technologies; Radio Access Technology for 5G Networks; 5G Network Interworking and Core Network Advancements; Vertical 5G Applications; and R&D and 5G Standardization. It starts by introducing emerging technologies in 5G software, hardware, and management aspects before moving on to cover waveform design for 5G and beyond; code design for multi-user MIMO; network slicing for 5G networks; machine type communication in the 5G era; provisioning unlicensed LAA interface for smart grid

applications; moving toward all-IT 5G end-to-end infrastructure; and more. This valuable resource: Provides a comprehensive reference for all layers of 5G networks Focuses on fundamental issues in an easy language that is understandable by a wide audience Includes both beginner and advanced examples at the end of each section Features sections on major open research challenges 5G Networks: Fundamental Requirements, Enabling Technologies, and Operations Management is an excellent book for graduate students, academic researchers, and industry professionals, involved in 5G technology. A highly original history, tracing civil war, the least understood and most intractable form of organized human aggression, from Ancient Rome through the centuries to present day. A fun-filled art activity ebook that will encourage kids to express themselves while teaching them about key artistic styles and a selection of pioneering artists from history. Explore your creative side as you discover the artist that lies within. Each of the fun activities included in this ebook will teach you about a different area of art and design. Learn about the history and theory of art before getting your hands dirty while creating your very own masterpieces. With more than 30 activities designed to encourage and stimulate even the most reluctant artist, How to Be an Artist gets the creative juices flowing. From mark making to woodworking, and photography to sculpture, there's a project for every art aficionado to get into. Perfect for children ages 7-9, the activities not only instil a passion for art, but also help kids learn about how art fits into the world of

STEAM. Famous artist pages teach children about the pioneers of artistic movements, such as Andy Warhol, Joan Miro, and Pablo Picasso. Different artistic disciplines are explained in the topic pages. From the basics, such as composition and perspective, to the trickier techniques of illusion and graphic design, this art activity ebook for kids has it all. The Peruvian Heritage Songbook presents four classic children's songs from Peru for young learners all over the world. Each song is fully illustrated with lyrics and sheet music so children of all ages can sing along at home with the included CD. This book contains a very small sample of the rich musical heritage of Peru. Please enjoy these songs and stories as you begin your journey to learn more about Peruvian music and culture. -Read along in your book while listening to the accompanying recordings. Sing along with the karaoke tracks while reading the book -Sing the songs in the book a cappella (voice only) -Play along with shakers, drums, and other instruments -Act out the stories with puppets, props, or costumes -For older children, follow the notes on the sheet music We hope this collection sparks a lifetime of exploration of world music. Stream the audio tracks for all Heritage Series Songbooks at [www.montessorimusiclab.com](http://www.montessorimusiclab.com) Montessori Music Lab is based in Cambridge, MA and produces educational music content for young people worldwide.

Known for her portraits of family, friends, writers, poets, artists, students, singers, salesmen, activists, and more, Alice Neel created forthright, intimate, and, at times,

humorous paintings that quietly engaged with political and social issues. In *Alice Neel, Uptown*, writer and curator Hilton Als brings together a body of paintings and works on paper of African-Americans, Latinos, Asians, and other people of color for the first time. Highlighting the innate diversity of Neel's approach, the selection looks at those whose portraits are often left out of the art-historical canon and how this extraordinary painter captured them; "what fascinated her was the breadth of humanity that she encountered," Als writes. The publication, which opens with a foreword by Jeremy Lewison, advisor to The Estate of Alice Neel, explores Neel's interest in the diversity of uptown New York and the variety of people amongst whom she lived. This group of portraits includes well-known figures such as playwright, actress, and author Alice Childress; the sociologist Horace R. Cayton, Jr.; the community activist Mercedes Arroyo; and the widely published academic Harold Cruse; alongside more anonymous individuals of a nurse, a ballet dancer, a taxi driver, a businessman, and a local kid who ran errands for Neel. In short and illuminating texts on specific works written in his characteristic narrative style, Als writes about the history of each sitter and offers insights into Neel and her work, while adding his own perspective. A contemporary and personal approach to the artist's oeuvre, Als's project is "an attempt to honor not only what Neel saw, but the generosity of her seeing." This catalogue is published on the occasion of the 2017 exhibitions of Neel's paintings and drawings at David Zwirner, New York, and Victoria Miro, London.

The Complete Edition

A stunning four-color biography of Congresswoman Alexandria Ocasio-Cortez in the bestselling tradition of Notorious RBG and Pelosi that explores her explosive rise and impact on the future of American culture and politics. The candidate was young—twenty-eight years old, a child of Puerto Rico, the Bronx, and Yorktown Heights. She was working as a waitress and bartender. She was completely unknown, and taking on a ten-term incumbent in a city famous for protecting its political institutions. “Women like me aren’t supposed to run for office,” Alexandria Ocasio-Cortez said in a video launching her campaign, the camera following her as she hastily pulled her hair into a bun. But she did. And in perhaps the most stunning upset in recent memory, she won. At twenty-nine, she was sworn in as the youngest member of the

116th Congress and became the youngest woman to serve as a representative in United States history. Before long, Ocasio-Cortez had earned her own shorthand title—AOC—and was one of the most talked-about public figures (loved and loathed) in the world. Her natural ability to connect with everyday people through the social media feeds grew her following into the multimillions. Every statement she made, every tweet and Instagram Live, went viral, and her term had barely begun before people were speculating that she could one day be president. The question seemed to be on everyone's mind: How did this woman come from nowhere to acquire such influence, and so fast? Now, in *Take Up Space*, that question is answered through a kaleidoscopic biography by the editors of *New York* magazine that features the riveting account of her rise by Lisa Miller, an essay by Rebecca Traister that explains why she is an unprecedented figure in American politics, and multiform explorations (reportage, comic, history, analysis, photography) of AOC's outsize impact on American culture and politics. Throughout, AOC is revealed in all her power and vulnerability, and understood in the context of the fast-changing America that

made her possible—and perhaps even inevitable.

Saving people and hunting demons: It's the family business For 12 seasons, no demon, ghost nor monster has been safe from Sam and Dean Winchester, the daring brothers and heroes of hit television show Supernatural. Combining elements of horror, thriller, drama and comedy, this fan favorite explores the world of the paranormal, with brief forays into heaven and hell-and family relationships-every week. As the longtime hit from the CW enters its lucky 13th season, now is the time to time to catch up with an all-new special edition from Entertainment Weekly, The Ultimate Guide to Supernatural. Packed with photographs from each season, a who's who of heaven and hell, and a full episode guide to all 12 seasons-plus exclusive interviews with stars Jensen Ackles, Jared Padalecki and Misha Collins, along with a guide to the guest stars, the top 10 guests, and our expert ranking of each and every episode, this is a must-have for all Supernatural fans. There's even a superfan set-visit diary from S.E. Hinton, the renowned author of The Outsiders. You should pick up your copy now . . . because you always have a choice. All Yesterdays is a book about the way we see dinosaurs and

other prehistoric animals. Lavishly illustrated with over sixty original artworks, *All Yesterdays* aims to challenge our notions of how prehistoric animals looked and behaved. As a critical exploration of palaeontological art, *All Yesterdays* asks questions about what is probable, what is possible, and what is commonly ignored. Written by palaeozoologist Darren Naish, and palaeontological artists John Conway and C.M. Kosemen, *All Yesterdays* is scientifically rigorous and artistically imaginative in its approach to fossils of the past - and those of the future.

A New York Times Notable Book Winner of 2022 Lionel Gelber Prize  
The first authoritative history of America's longest war by one of the world's leading scholar-practitioners. The American war in Afghanistan, which began in 2001, is now the longest armed conflict in the nation's history. It is currently winding down, and American troops are likely to leave soon but only after a stay of nearly two decades. In *The American War in Afghanistan*, Carter Malkasian provides the first comprehensive history of the entire conflict. Malkasian is both a leading academic authority on the subject and an experienced practitioner, having spent

nearly two years working in the Afghan countryside and going on to serve as the senior advisor to General Joseph Dunford, the US military commander in Afghanistan and later the chairman of the joint chiefs of staff. Drawing from a deep well of local knowledge, understanding of Pashto, and review of primary source documents, Malkasian moves through the war's multiple phases: the 2001 invasion and after; the light American footprint during the 2003 Iraq invasion; the resurgence of the Taliban in 2006, the Obama-era surge, and the various resets in strategy and force allocations that occurred from 2011 onward, culminating in the 2018-2020 peace talks. Malkasian lived through much of it, and draws from his own experiences to provide a unique vantage point on the war. Today, the Taliban is the most powerful faction, and sees victory as probable. The ultimate outcome after America leaves is inherently unpredictable given the multitude of actors there, but one thing is sure: the war did not go as America had hoped. Although the al-Qa'eda leader Osama bin Laden was killed and no major attack on the American homeland was carried out after 2001, the United States was unable to end the violence or hand off the war to the Afghan

authorities, which could not survive without US military backing. The American War in Afghanistan explains why the war had such a disappointing outcome. Wise and all-encompassing, The American War in Afghanistan provides a truly vivid portrait of the conflict in all of its phases that will remain the authoritative account for years to come.

The global order is shifting. Even though no major war has intervened to reshape the architecture of the international order, the global financial crisis has accentuated the emergence of an enlarged global leadership. It is clear that change is afoot. The United States may be hanging on as the world's leading power, as the European Union remains an independent force in global politics, but a host of rising states—including China, India, and Brazil—clamor to be heard and take on bigger roles in world forums. *Rising States, Rising Institutions* features a panel of distinguished scholars who examine the forces at work: Gregory Chin (York University), Daniel W. Drezner (Tufts University), Thomas Hale (Princeton University), Andrew Hurrell (Oxford University), G. John Ikenberry (Princeton University), John Kirton (University of Toronto), Flynt Leverett

(New America Foundation), Steven E. Miller (Harvard University), Andrew Moravcsik (Princeton University), Amrita Narlikar (Cambridge University), and Anne-Marie Slaughter (U.S. State Department). Together they analyze different models of international cooperation, the states that have most actively challenged the existing order, and leading and emergent international institutions such as the G-20, the nascent regime for sovereign wealth funds, the International Atomic Energy Agency, and the entities organized to foster cooperation in the war on terror.

The Mysterious Deaths of Barry and Honey Sherman

All Yesterdays

**NATIONAL BESTSELLER** A top journalist crosses the yellow tape to investigate a shocking high-society crime. Billionaires, philanthropists, socialites . . . victims. Barry and Honey Sherman appeared to lead charmed lives. But the world was

shocked in late 2017 when their bodies were found in a bizarre tableau in their elegant Toronto home. First described as murder-suicide — belts looped around their necks, they were found seated beside their basement swimming pool — police later ruled it a staged, targeted double murder. Nothing about the case made sense to friends of the founder of one of the world's largest generic pharmaceutical firms and his wife, a powerhouse in Canada's charity world. Together, their wealth has been estimated at well over \$4.7 billion. There was another side to the story. A strategic genius who built a large generic drug company — Apotex Inc. — Barry Sherman was a self-described workaholic, renowned risk-taker, and disruptor during his fifty-year career. Regarded as a generous friend by many, Sherman was also feared by others. He was criticized for stifling academic freedom and using the courts to win at all costs. Upset with building issues at his mansion, he sued and recouped millions from tradespeople. At the time of his death, Sherman had just won a decades-old legal case involving four cousins who wanted 20 percent of his fortune. Toronto Star investigative journalist Kevin Donovan chronicles the unsettling story from the beginning, interviewing family members, friends, and colleagues, and sheds new light on the Shermans' lives and the disturbing double murder. Deeply researched and authoritative, *The Billionaire Murders* is a compulsively readable tale of a strange and perplexing crime.

Reveals the life of Lakota healer Nicholas Black Elk as he led his tribe's battle

against white settlers who threatened their homes and buffalo herds, and describes the victories and tragedies at Little Bighorn and Wounded Knee. Reprint.

"LEGENDARY SURFERS Volume 3: 1930s" details the surf world of the 1930s, including California, Florida, Hawaii, Australia and Britain. This is not a coffee table book. It is specifically written for surfers who want to know the details of the heritage we are blessed to share, as told by those who lived it.

**#1 NEW YORK TIMES BESTSELLER •** The thrilling sequel to the beloved worldwide bestseller Ready Player One, the near-future adventure that inspired the blockbuster Steven Spielberg film. **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST •** "The game is on again. . . . A great mix of exciting fantasy and threatening fact."—The Wall Street Journal **AN UNEXPECTED QUEST. TWO WORLDS AT STAKE. ARE YOU READY?** Days after winning OASIS founder James Halliday's contest, Wade Watts makes a discovery that changes everything. Hidden within Halliday's vaults, waiting for his heir to find, lies a technological advancement that will once again change the world and make the OASIS a thousand times more wondrous—and addictive—than even Wade dreamed possible. With it comes a new riddle, and a new quest—a last Easter egg from Halliday, hinting at a mysterious prize. And an unexpected, impossibly powerful, and dangerous new rival awaits, one who'll kill millions to get what he wants. Wade's life and the future of the OASIS are again at stake, but this time the fate of

humanity also hangs in the balance. Lovingly nostalgic and wildly original as only Ernest Cline could conceive it, Ready Player Two takes us on another imaginative, fun, action-packed adventure through his beloved virtual universe, and jolts us thrillingly into the future once again.

Strategic Latency Unleashed

Atheism Kills

*The traumas resulting from terrorism and political violence have profound implications for the stability and normal operation of modern societies, and a negative impact on the effectiveness and legitimacy of their governments. This publication presents articles from the NATO Advanced Training Course (ATC) Defence Against Terrorism: Different Dimensions and Trends of the Emerging Threat - Terrorism' held in Kabul, Afghanistan in May 2010. This course was attended by serving Afghan officers of various ranks and also by a number of Afghan*

*civilians, and was designed to have a practical focus for the participants, all of whom were involved in counterterrorism operations.*

*With most of Rabbit's zombie army out of the way, only one thing stands between Ox and Tiger and taking down Rabbit for good—Monkey. Her sheer strength and power, once disciplined in life, are completely unhinged in death, making her far and away the strongest fighter! With only four fighters and one zombie remaining, who will come out victorious? Don't miss the thrilling, unexpected conclusion to the twelfth Zodiac War! -- VIZ Media*

*Barbara La Marr's (1896--1926) publicist once confessed: "There was no reason to lie about Barbara La Marr. Everything she said, everything she did was colored with news-value." When La Marr was sixteen, her older half-sister and a male companion reportedly kidnapped her, causing a sensation in the media. One year later, her behavior in Los Angeles nightclubs caused law enforcement to declare her "too beautiful" to be on her own in the city, and she was ordered to leave. When La Marr returned to Hollywood years later, her loveliness and raw talent caught the attention of producers and catapulted her to movie stardom. In the first full-length biography of the woman known as the "girl who was too beautiful," Sherri Snyder presents a complete portrait of one of the silent era's most infamous screen sirens. In*

*five short years, La Marr appeared in twenty-six films, including The Prisoner of Zenda (1922), Trifling Women (1922), The Eternal City (1923), The Shooting of Dan McGrew (1924), and Thy Name Is Woman (1924). Yet by 1925 -- finding herself beset by numerous scandals, several failed marriages, a hidden pregnancy, and personal prejudice based on her onscreen persona -- she fell out of public favor. When she was diagnosed with a fatal lung condition, she continued to work, undeterred, until she collapsed on set. She died at the age of twenty-nine. Few stars have burned as brightly and as briefly as Barbara La Marr, and her extraordinary life story is one of tempestuous passions as well as perseverance in the face of adversity. Drawing on never-before-released diary entries, correspondence, and creative works, Snyder's biography offers a valuable perspective on her contributions to silent-era Hollywood and the cinematic arts.*

*"Explores European foreign policy and the degree of European Union success in proposing itself as a valid international actor, drawing from the expertise of scholars and practitioners in many disciplines. Addresses issues past and present, theoretical and practice-oriented, and country- and region-specific"--Provided by publisher.*

*The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special*

*Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.*

From Guillermo del Toro, Universal Brand Development, and DreamWorks Animation Television comes a graphic novel with further adventures for teenage Jim Lake, Jr., and the trolls from Netflix's original series, Trollhunters! Trollhunters executive

producer and writer, Marc Guggenheim, and How to Train Your Dragon graphic novel writer, Richard Hamilton, work alongside Trollhunters creator and executive producer Guillermo del Toro to co-write this companion tale to the Emmy-winning Netflix series! When fifteen-year-old teenager Jim Lake, Jr., stumbled upon a magical amulet that gave him a powerful suit of armor and the title of Trollhunter--defender of the good trolls--he began a journey that no human had ever taken. With his friends he has been discovering the mysteries of the Trolls that live beneath his hometown. The secrets of the great troll warriors of the past are crucial tools for the new Trollhunter, and the time has come for Jim to appreciate the battles of Kanjigar the Courageous, who through his own struggles, triumphs, and failures lead the trolls after the Battle of Killahead Bridge through unknown territory, across oceans and continents, and past fearsome foes! With his friends by his side, Jim continues the fight against the Gumm-Gumms and their allies!

In *Atheism Kills*, Barak Lurie exposes the horrors of a world without God. Contrary to the mantra we've heard time and time again that religion is responsible for more deaths than anything else, it is in fact the absence of God which has killed--in obscene numbers. Ever since atheism first assumed government control in the French Revolution, it has done nothing but kill. Atheism has killed through its many deputies: progressivism, eugenics, fascism, and communism. Lurie shows that it was the godlessness in each of these ideologies that killed hundreds of millions. But

atheism doesn't just kill lives. It kills purpose, free will, beauty, compassion, a sense of the past and future, creativity, and freedom itself. Atheism offers only the horrors of chaos and totalitarianism. The world misplaces its focus on Radical Islam as the greatest threat to civilization. As horrible as it is, it is doing nothing and having no sense of self which are the true enemies. It was our will to fight and sense of mission that overcame fascism and communism. We must have these to keep Radical Islam at bay, too. This is why we must resist the growth of atheism. It was God that gave us our freedom. It was God who gave our sense of purpose that created civilization. Take those away, and there is nothing to fight for. In this way, Lurie shows that the lack of belief in God is our greatest danger. How does he know? Because like a hurricane, godlessness has only known how to destroy everything in its path. It has never created. Like there will always be fires, there will always be enemies that seek to destroy our civilization. But if we don't have fire stations with crew, and protocol in each city to deal with fires, those fires will consume us. Likewise, how we prepare ourselves to deal with horrific ideologies will be what saves us. That preparation can only come with our embrace of the centrality of God.

Team sports like football, basketball, soccer, and rugby are hugely popular the world over, on both college and professional levels, and such popularity means that they are big business. Very big. Broadcasting rights alone bring in billions: ESPN paid \$5.6 billion to broadcast college football playoffs for twelve years; Turner Sports/CBS

shelled out \$10.4 billion to show the national college basketball tournament through 2024; and the most recent NBA TV deal came in at a cool \$26.4 billion. As the rewards for winning have increased, it's no surprise that sports team budgets have followed suit. Sure, the athletic program at the University of Texas brought in \$161 million last year, but the Longhorns also spent \$154 million over the same period. Fifteen other college athletics program also racked up over \$100 million in annual expenses. But that's child's play compared to the outgoings at the world's most valuable soccer team, Manchester United, which spent more than \$500 million in 2015. The trouble is that all this spending often fails to yield better results. Teams in all sports have tried just about every gimmick to "hack" their way to better performance. But as they've gotten stuck in stats, mired in backroom politics, and diverted by the facilities arms race, many have lost sight of what should've been their primary focus all along: the game itself. In *Game Changer*, Fergus Connolly shows how to improve performance with evidence-based analysis and athlete-focused training. Through his unprecedented experiences with teams in professional football, basketball, rugby, soccer, Aussie Rules, and Gaelic football, as well as with elite military units, Connolly has discovered how to break down the common elements in all sports to their basic components so that each moment of any game can be better analyzed, whether you're a player or a coach. The lessons of game day then can be used to create valuable learning experiences in training, evaluate the

quality of your team's performance, and home in on what's working and what isn't. Game Changer also shows you how to expand training focus from players' physical qualities to also advance athletes technically, tactically, and psychologically. His TTPP Model not only helps players continually progress but also stops treating them like a disposable commodity and instead prioritizes athlete health. Bringing together the latest evidence-based practices and lessons from business, psychology, biology, and many other fields, Game Changer is the first book of its kind that helps coaches, athletes, and casual fans:

- Create a cohesive game plan that improves performance through defined objectives, strategies, and tactics
- Put statistical analysis and technology into context so teams can bypass the hype and get meaningful results
- Identify dominant qualities to maximize during training and limiting factors to improve
- Create realistic, immersive learning experiences for individual players and the entire team that deliver defined outcomes
- Structure player development with a new, holistic model that puts athlete health first and helps reduce the chance of injury and burnout
- Balance training load so that all players are fresh and ready to play at their best in competition
- Rethink coaching and organizational leadership and enhance communication, group dynamics, and player interaction
- Create a winning team culture

Featuring exquisite photos of more than 800 contemporary and historic works, this first-of-its-kind book reveals how the process of casting--pouring material into a

mold--has transformed our world through its history and omnipresence. In these image-rich pages, craft, fine art, design, and everyday objects offer us perspectives on casting's unique possibilities, its place in history, and its role in contemporary object creation. Comprehensive and insightful, the book includes writings on casting as it relates to Art History (by Suzanne Ramljak), Large-Scale Metal (by Joseph Becherer), Ceramics (by Ezra Shales), Glass (by Susie J. Silbert), Jewelry (by Jen Townsend), and Alternative Materials (by Elaine A. King). A multi-disciplinary approach--including everything from traditional lost wax casting in non-ferrous metals to casting rubber, glass, porcelain, plaster, and some very unexpected materials--makes this an essential resource for artists, craftspeople, historians, designers, and everyone interested in the objects that populate our world.

Nations and international organizations are increasingly using sanctions as a means to achieve their foreign policy aims. However, sanctions are ineffective if they are executed without a clear strategy responsive to the nature and changing behavior of the target. In *The Art of Sanctions*, Richard Nephew offers a much-needed practical framework for planning and applying sanctions that focuses not just on the initial sanctions strategy but also, crucially, on how to calibrate along the way and how to decide when sanctions have achieved maximum effectiveness. Nephew—a leader in the design and implementation of sanctions on Iran—develops guidelines for interpreting targets' responses to sanctions based on two critical factors: pain and

resolve. The efficacy of sanctions lies in the application of pain against a target, but targets may have significant resolve to resist, tolerate, or overcome this pain. Understanding the interplay of pain and resolve is central to using sanctions both successfully and humanely. With attention to these two key variables, and to how they change over the course of a sanctions regime, policy makers can pinpoint when diplomatic intervention is likely to succeed or when escalation is necessary. Focusing on lessons learned from sanctions on both Iran and Iraq, Nephew provides policymakers with practical guidance on how to measure and respond to pain and resolve in the service of strong and successful sanctions regimes.

How the New Energy Abundance Upends Global Politics and Strengthens America's Power

Peruvian Heritage Songbook

On Freedom and Democracy in the 21st Century

Challenges for Global Governance

This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His

book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

From one of the leading intellectuals of the digital age, *The Digital Republic* is the definitive guide to the great political question of our time: how can freedom and democracy survive in a world of powerful digital technologies? A Financial Times “Book to Read” in 2022 Not long ago, the tech industry was widely admired, and the internet was regarded as a tonic for freedom and democracy. Not anymore. Every day, the headlines blaze with reports of racist algorithms, data leaks, and social media platforms festering with falsehood and hate. In *The Digital Republic*, acclaimed author Jamie Susskind argues that these problems are not the fault of a few bad apples at the top of the industry. They are the result of our failure to govern technology properly. *The Digital Republic* charts a new course. It offers a plan for the digital age: new legal standards, new public bodies and institutions, new duties on platforms, new rights and regulators, new codes of conduct for people in the tech industry. Inspired by the great political essays of the past, and steeped in the traditions of republican thought, it offers a vision of a different type of society: a digital republic in which human and technological flourishing go hand in hand.

Relates the important part Strauss Mouse and his family played in the creation of one of the world's most beloved Christmas carols, "Silent Night."

Hope Wabuke weaves together a coming-of-age narrative: a Black girl child of immigrants fleeing from genocidal terror to America.

Teaching is one of the most rewarding professions, but also one of the most demanding. This book

offers simple, ready-to-use, and evidence-proven mindfulness techniques to help educators manage the stresses of the classroom, cultivate an exceptional learning environment, and revitalize both their teaching and their students' knowledge acquisition. Drawing on basic and applied research in the fields of neuroscience, psychology, and education, as well as the author's extensive experience as a mindfulness practitioner, teacher, and scientist, it includes exercises in mindfulness, emotional awareness, movement, listening, and more, all with real-time classroom applications.

They Can't Kill Us Until They Kill Us

***“An engaging, beautifully synthesized page-turner” (Slate). The #1 New York Times bestseller and Time #1 Nonfiction Book of the Year: Hillary Rodham Clinton’s most personal memoir yet, about the 2016 presidential election. In this “candid and blackly funny” (The New York Times) memoir, Hillary Rodham Clinton reveals what she was thinking and feeling during one of the most controversial and unpredictable presidential elections in history. She takes us inside the intense personal experience of becoming the first woman nominated***

***for president by a major party in an election marked by rage, sexism, exhilarating highs and infuriating lows, stranger-than-fiction twists, Russian interference, and an opponent who broke all the rules. “At her most emotionally raw” (People), Hillary describes what it was like to run against Donald Trump, the mistakes she made, how she has coped with a shocking and devastating loss, and how she found the strength to pick herself back up afterward. She tells readers what it took to get back on her feet—the rituals, relationships, and reading that got her through, and what the experience has taught her about life. In this “feminist manifesto” (The New York Times), she speaks to the challenges of being a strong woman in the public eye, the criticism over her voice, age, and appearance, and the double standard confronting women in politics. Offering a “bracing... guide to our political arena” (The Washington Post), What Happened lays out how the 2016 election was marked by an unprecedented assault on our democracy by a foreign adversary. By analyzing the evidence and connecting the dots, Hillary shows just how dangerous the forces are that shaped the outcome, and why Americans need to understand them to protect our values and our democracy in the future. The election of 2016 was unprecedented and historic. What Happened is the story of that campaign, now with a new epilogue showing how Hillary grappled with many of her worst fears coming true in the Trump Era, while finding new hope in a surge of civic activism, women running for office, and***

*young people marching in the streets.*

*A leading foreign correspondent looks at how social media has transformed the modern battlefield, and how wars are fought Modern warfare is a war of narratives, where bullets are fired both physically and virtually. Whether you are a president or a terrorist, if you don't understand how to deploy the power of social media effectively you may win the odd battle but you will lose a twenty-first century war. Here, journalist David Patrikarakos draws on unprecedented access to key players to provide a new narrative for modern warfare. He travels thousands of miles across continents to meet a de-radicalized female member of ISIS recruited via Skype, a liberal Russian in Siberia who takes a job manufacturing "Ukrainian" news, and many others to explore the way social media has transformed the way we fight, win, and consume wars-and what this means for the world going forward.*

*Ferdinand likes to sit quietly and smell the flowers, but one day he gets stung by a bee and his snorting and stomping convince everyone that he is the fiercest of bulls.*

**A stunning collection of essays using music as a vantage point through which to examine and interrogate the world we live in, culturally and politically. In an age of confusion, fear, and loss, Hanif Abdurraqib's is a voice that matters. Whether he's attending a Bruce Springsteen concert the day after visiting Michael Brown's grave, or discussing public displays of affection at a Carly Rae Jepsen show, he writes with a poignancy and magnetism that resonates profoundly. In the wake of the nightclub attacks in Paris, he recalls how he sought refuge as a teenager in music, at shows, and wonders whether the next generation of young Muslims will not be afforded that opportunity now. While discussing the everyday threat to the lives of black Americans, Abdurraqib recounts the first time he was ordered to the ground by police officers: for attempting to enter his own car. In essays that have been published by the New York Times, MTV, and Pitchfork, among others—along with original, previously unreleased essays—Abdurraqib uses music and culture as a lens through which to view our world, so that we might better understand ourselves, and in so doing proves himself a bellwether for our times.**

**Windfall is the boldest profile of the world's energy resources since Daniel Yergin's *The Quest*, asserting that the new energy abundance—due to oil and gas resources once deemed too expensive—is transforming the geo-political order and is boosting American power. "Riveting and comprehensive...a smart, deeply researched primer on the subject." —The New York Times Book Review As a new**

administration focuses on driving American energy production, O'Sullivan's "refreshing and illuminating" (Foreign Policy) Windfall describes how new energy realities have profoundly affected the world of international relations and security. New technologies led to oversupplied oil markets and an emerging natural gas glut. This did more than drive down prices—it changed the structure of markets and altered the way many countries wield power and influence. America's new energy prowess has global implications. It transforms politics in Russia, Europe, China, and the Middle East. O'Sullivan considers the landscape, offering insights and presenting consequences for each region's domestic stability as energy abundance upends traditional partnerships, creating opportunities for cooperation. The advantages of this new abundance are greater than its downside for the US: it strengthens American hard and soft power. This is "a powerful argument for how America should capitalise on the 'New Energy Abundance'" (The Financial Times) and an explanation of how new energy realities create a strategic environment to America's advantage.

Medusa has lost her head, and her serpents are hunting through the ancient Greek ruins for a new host. So themed is The Ruins haunted house where Luna is a make-up artist. As the Minotaur, the Siren, the Cyclops and a host of mythological beasts take their places for opening night, Luna is thrust into a dark world where her monsters are all too real. Can she survive The Ruins? Written in two acts, this piece is intended to play in the house amid the audience as well as onstage. The Ruins is of adult-theme, with a running-time of approximately 90

**minutes, and a flexible cast of 8-20+.**

**"Weekly, there are major threats, mass killings, terrorist attacks, and even weather-related disasters--the list goes on. And this increasingly dangerous world includes more violent and deadly threats that are specifically targeting everyday civilians ... [Via this safety bible], ... you can make educated predictions using the new key questions of who, why, where, when, and how from the attacker's point of view"--Amazon.com.**

**"December 2016. Luke Harding, the Guardian reporter and former Moscow bureau chief, quietly meets former MI6 officer Christopher Steele in a London pub to discuss President-elect Donald Trump's Russia connections. A month later, Steele's now-famous dossier sparks what may be the biggest scandal of the modern era. The names of the Americans involved are well-known, but here Harding also shines a light on powerful Russian figures whose motivations and instructions may have been coming from the highest echelons of the Kremlin. Harding takes the reader through every bizarre and disquieting detail of the Trump-Russia story, an event so huge it involves international espionage, off-shore banks, sketchy real estate deals, the Miss Universe pageant, mobsters, money laundering, poisoned dissidents, computer hacking, and the most shocking election in American history." -- Provided by publisher.**
