The 20/20 Diet by Dr. Phil McGraw gives readers a perfect, 20/20 vision of what their lives and bodies will look like when they finally lose weight and keep it off forever.

I'm the first Mage born in 200 years. I've turned a city into an island, erected a barrier around an entire country, and awakened a war hero from a 200 year old slumber. Prophecies have marked my coming. Kings and nations have begged for my aid in times of peril. I hold the power to create and destroy nations. My name is Rhebengarthen. To my friends and family, I'm just Garth. The world knows me as the Advent Mage. And despite the rumors that you might have heard about me, this is what really happened.

In 1988 Tehran, teenaged girls Farrin and Sadira are sentenced to death for homosexuality. Farrin prays that her wealthy family will be able to save them before it is too late. Based on a true story.

It derives from the Multitude Project-a European Cost Action project that incorpo

The more powerful the family...the darker the secrets. Meet the family everyone's talking about in this prequel novella to the Sicily's Corretti Dynasty series, brought to you by Harlequin Presents. Investigative journalist Emily Hyslop is furious when her editor—and ex—reassigns her from a career-making expos to a frivolous wedding in Sicily. But scandalous secrets lie behind the union of the rival Corretti and Battaglia families. Things start looking up when Emily meets the most intimidating, not to mention sexiest, man she's ever encountered.... Detective Anton Soranno has valuable insight into the Correttis and their scandalous dealings...and plenty of reason to hate them. He's the perfect source of information—and the more he helps Emily with her story, the more time they have to explore their intense desire. But even as their passionate nights uncover surprising feelings in both of them, Emily and Anton know that she must leave Sicily once the wedding is over.... Look for more books in the Sicily's Corretti Dynasty series from Harlequin Presents, beginning with A Legacy of Secrets by Carol Marinelli.

A three-year program in the sciences for high school. Teacher (wraparound) ed. provides teachers with background information, strategies for guiding students through each activity using an inquiry-based approach, answers to the

questions posed, and outcomes and indicators of success for each activity; has reduced student pages so teachers are on the same page as the students and still have access to the strategies and answers.

Modeling Mobility with Open Data

Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

This text is an unbound, binder-ready edition. Information Technology for Management by Turban, Volonino Over the years, this leading IT textbook had distinguished itself with an emphasis on illustrating the use of cutting edge business technologies for achieving managerial goals and objectives. The 9th ed continues this tradition with coverage of emerging trends in Mobile Computing and Commerce, IT virtualization, Social Media, Cloud Computing and the Management and Analysis of Big Data along with advances in more established areas of Information Technology. The book prepares students for professional careers in a rapidly changing and competitive environment by demonstrating the connection between IT concepts and practice more clearly than any other textbook on the market today. Each chapter contains numerous case studies and real world examples illustrating how businesses increase productivity, improve efficiency, enhance communication and collaboration, and gain competitive advantages through the use of Information Technologies.

The transmission of signals, signs, messages, images, words and sounds by wire, radio, optical and other electromagnetic systems is known as telecommunications. The information is transmitted via transmission media or through electromagnetic radiation. The transmission paths are divided into communication channels in order to facilitate multiplexing. The technologies of telecommunication are broadly divided into wireless and wired methods. Some of the common media which make use of principles from telecommunications are telephone, radio, television, internet, local area network, etc. The three main elements of a telecommunication system are transmitter, transmission medium and receiver area. Transmitter is used to take information and convert it to a signal. The transmission medium carries the signal, and the receiver takes the signal from the channel and converts it to usable information for the recipient. The topics included in this book on telecommunications are of utmost significance and bound to provide incredible insights to readers. It covers in detail some existing theories and innovative

concepts related to this field. This textbook attempts to assist those with a goal of delving into this field.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.
The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.
The CCNA 200-301 Network Simulator is a single-user software package. It helps users develop and improve hands-on configuration and troubleshooting skills without the investment in expensive lab hardware. This state-of-the-art, interactive simulation software enables you to practice your networking skills with hundreds of structured labs designed to help you learn by doing, the most effective method of learning. Experience realistic network device responses as you perform each lab, which include detailed instructions, topology diagrams, critical thinking questions, hints, and answers. Working through the labs, you will quickly become proficient with all the common Cisco IOS router and switch commands on the CCNA exam. Unlike other simulators on the market, the lab

scenarios included in the CCNA 200-301 Network Simulator are far more complex, challenging you to learn how to perform real-world network configuration and troubleshooting tasks.

This book is a comprehensive primer to both traditional and emerging E-Commerce technologies. Students with no prior technical knowledge will be able to grasp complex topics such as networking, Internet security, Web languages and other important subjects in a way that illustrates their use through case studies and practice by completing Web projects.

Since the first edition was published in 1983, this highly-regarded introductory textbook has been used by many generations of students worldwide. It is specifically tailored to the requirements of first or second year geology undergraduates. The third edition has been extensively revised and updated to include many new sections and over 50 new or redrawn illustrations. There are now over 220 illustrations, many incorporating a second colour to highlight essential features. The format has been changed to enhance the visual attractiveness of the book. The tripartite organization of the first and second editions has been modified by combining the purely descriptive or factual aspects of fault and fold structure in the earlier chapters with a simple treatment of mechanisms, leaving the more geometrically complex treatment until after the relevant sections on stress and strain, as before. Some subjects are introduced for the first time, e.g. inversion and orogen collapse, and others have been extensively modified, e.g. the chapter on gravity controlled structures now emphasises modern work on salt tectonics. The last third of the book is devoted to the wider context of geological structures and how they relate to plate tectonics. The final two chapters have been considerably expanded and give examples of various types of geological structures in their plate tectonic settings in both modern and ancient orogenic belts.

"Learn essential exercises and tips as they are presented in this compilation of tunes by the legendary Robert Johnson. As part of Stefan Grossman's Guitar Workshop Audio Series not only does this book contain valuable lessons, but as an added bonus, the three accompanying CDs contain three full hours of instruction featuring note-

by-note, phrase-by-phrase instruction to make the style and technique of Robert Johnson something that everyone can learn. Master instructor Woody Mann teaches you step-by-step to play these selections: Kokomo Blues; Blue Day Blues; Devil Got My Woman; My Black Mama; Roll and Tumble Blues; Scream' and Hollerin' the Blues; Life Saver Blues; and Georgia Bound. Written in standard notation and tablature."

This contributed volume contains the conference proceedings of the Simulation of Urban Mobility (SUMO) conference 2014, Berlin. The included research papers cover a wide range of topics in traffic planning and simulation, including open data, vehicular communication, e-mobility, urban mobility, multimodal traffic as well as usage approaches. The target audience

primarily comprises researchers and experts in the field, but the book may also be beneficial for graduate students.
A singing frog reluctantly babysits a duck egg in this sweetly hilarious picture book from the brilliant mind that brought you The Fantastic Flying Books of Mr. Morris Lessmore. While egg-sitting for his friend Kack Kack the duck, Bently Hopperton the frog is so bored that he cannot resist painting the egg's shell. But when the decorated egg is mistaken for an Easter egg and is egg-napped, Bently discovers that he has in fact, grown terrifically fond of that ole egg. Can he rescue the egg before it's too late? An homage to fatherhood, and the appreciation of swell art.

Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the Why Study series comes in. This series of books, aimed at students, parents and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not.
Toast: the ultimate fast food. Everyone loves toast. And now it's the piping-hot new food trend. Posh Toast features every toast recipe you could ever need: Breakfast Toasts including Eggs Royale, Chocolate Spread & Cream Cheese, Lox & Cream Cheese Lunch Toasts including Mozzarella & Kale Pesto, Avocado, Tahini & Toasted Chickpeas, Mint & Walnut Baba Ganoush Snacks & Canape Toasts including Mini Croque Monsieurs, Swedish Prawns, Tuna Tartare Supper Toasts including Posh Beans, Spiced Potted Crab, Warm Hummus and Spiced Lamb With over 70 recipes, each with a gorgeous photo, plus a guide to bread basics and toasting, this is the ultimate cookbook for toast addicts, expert chefs and novices alike. It's toast. And it's posh. It's Posh Toast.
In the first installment of the A Fire Beneath the Skin trilogy, the city of Klaar has never fallen. No enemy has ever made it across the Long Bridge or penetrated the city's mighty walls. Even when a powerful invading army shows up at the gates, the duke and his daughter, Rina

Veraiin, are certain that it poses little threat. But they are cruelly betrayed from within and, in a horrific spasm of violence, the city is brought to its knees. With the help of her bodyguard, Kork, the battle-trained young Rina narrowly escapes the slaughter and makes her way to the lair of an ancient sorcerer--the Ink Mage--who gifts her with a strange, beautiful set of magical tattoos. Now a duchess in exile, Rina sets out on a quest to reclaim what is rightfully hers, aided by a motley assortment of followers who will help her in her cause--some for noble reasons and others for their own dark purposes. With the enemy's agents nipping at her heels, Rina must learn to harness her new and startling magical powers if she is to assert her rightful place as ruler of Klaar.

Gill's tarot pack is based on the structure of ''The Tree of Life''. Much of the imagery in ''The Gill Tarot Deck'' draws from passages in classical religious literature. ''The Gill Tarot'' by Elizabeth Josephine Gill presents 78 stunning full-color pictures which enable the reader to see his or her own reflection of life.
The increasing power of computer technologies, the evolution of software en- neering and the advent of the intelligent transport systems has prompted traf c simulation to become one of the most used approaches for traf c analysis in s- port of the design and evaluation of traf c systems. The ability of traf c simulation to emulate the time variability of traf c phenomena makes it a unique tool for capturing the complexity of traf c systems. In recent years, traf c simulation – and namely microscopic traf c simulation – has moved from the academic to the professional world. A wide variety of traf- c simulation software is currently available on the market and it is utilized by thousands of users, consultants, researchers and public agencies. Microscopic traf c simulation based on the emulation of traf c ows from the dynamics of individual vehicles is becoming one the most attractive approaches. However, traf c simulation still lacks a uni ed treatment. Dozens of papers on theory and applications are published in scienti c journals every year. A search of simulation-related papers and workshops through the

proceedings of the last annual TRB meetings would support this assertion, as would a review of the minutes from speci cally dedicated meetings such as the International Symposiums on Traf c Simulation (Yokohama, 2002; Lausanne, 2006; Brisbane, 2008) or the International Workshops on Traf c Modeling and Simulation (Tucson, 2001; Barcelona, 2003; Sedona, 2005; Graz 2008). Yet, the only comprehensive treatment of the subject to be found so far is in the user's manuals of various software products.

Why is fashion "in fashion" in museums today? This timely volume brings together expert scholars and curators to examine the reasons behind fashion's popularity in the twenty-first century museum and the impact this has had on wider museum practice. Chapters explore the role of fashion in the museum across a range of international case studies including the Costume Institute at the Metropolitan Museum of Art in New York, The Fashion Museum at Bath, ModeMuseum in Antwerp and many more. Contributions look at topics such as how fashion has made museums accessible to diverse audiences and how curators present broader themes and issues such as gender, class and technology innovatively through exhibiting fashion. Drawing on approaches from dress history, fashion studies, museum studies and curatorship, this engaging book will be key reading for students and scholars across a range of disciplines.

This is the eBook version of the print title. Note that the eBook does not provide access to the practice test software that accompanies the print book. Learn, prepare, and practice for CCNA Cyber Ops SECFND 210-250 exam success with this Cert Guide from Pearson IT Certification, a leader in IT Certification learning. Master CCNA Cyber Ops SECFND 210-250 exam topics Assess your knowledge with chapter-ending quizzes Review key concepts with exam preparation tasks CCNA Cyber Ops SECFND 210-250 Official Cert Guide is a best-of-breed exam study guide. Cisco enterprise security experts Omar Santos, Joseph Muniz, and Stefano De Crescenzo share preparation hints and test-taking tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. Material is presented in a concise manner, focusing on increasing your understanding and retention of exam topics. The book presents you with an organized test preparation routine through the use of proven series elements and techniques. Exam topic lists make referencing easy. Chapter-ending Exam Preparation Tasks help you drill on key concepts you must know

thoroughly. Review questions help you assess your knowledge, and a final preparation chapter guides you through tools and resources to help you craft your final study plan. Well-regarded for its level of detail, assessment features, and challenging review questions and exercises, this study guide helps you master the concepts and techniques that will allow you to succeed on the exam the first time. The study guide helps you master all the topics on the CCNA Cyber Ops SECFND exam, including: Fundamentals of networking protocols and networking device types Network security devices and cloud services Security principles Access control models Security management concepts and techniques Fundamentals of cryptography and PKI Essentials of Virtual Private Networks (VPNs) Windows-based Analysis Linux /MAC OS X-based Analysis Endpoint security technologies Network and host telemetry Security monitoring operations and challenges Types of attacks and vulnerabilities Security evasion techniques

The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In Underwater Dogs, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.
