Detection of Heavy Metals from Compound Herbal DrugsLAP Lambert Academic Publishing

Miracle at the Rauza (Mausoleum) of the Prophet Hazrat Mohammad Mustafa SAWW is a real happening seen by the writer in dream, as clear as the day light. It was a chosen communication. Dreams have classes, in this dream vivid time bound enacts of the angels occurred, who are in service at the Rauza of the Mahboob (dear) of God Jalay Jalalahoo (God is glorious). The incident of the miracle explains of the status and the station of the Prophet of God Hazrat Mohammad SAWW, who will look towards God for command and revelation came. Of these the most generalised for the humanity is the Aayet 5:32 of the Quran to convey to stop bloodshed. The Aayet says: For this very reason We had made it obligatory on the Children of Israel that whoever neither in lieu of life nor in retribution to spreading disturbance in the country, (but without reason) will slay anyone then as if he killed the entire humanity and that who saved a life then as if he saved the entire humanity...

Pakistan Our Difficult Neighbour and India's Islamic Dimensions

Detection of Heavy Metals from Compound Herbal Drugs

Medicine and Life Sciences in India

In this remarkably candid book, the author has taken a hard look at Pakistan, in his words our difficult neighbour and analysed the reasons as to why the two countries have never been friends and probably will not be in the future, at least not in the immediate one. The author attributes India's failure to neutralise Pakistan to its kind of near constant Gandhian (passive) approach to India's security interests. The author believes that the future of Muslims in India is bright and that it would be quite a lusterless country without them. It is a matter of time before India has its first Muslim Prime Minister but this will happen when the latter represents interests of all Indians and not merely those of the Muslims. His study of Muslims is spread of a wide range of inter related perspectives. What has been written comes through the author's personal knowledge, not through any ideological prism and also secondary observations of other people and least of all through rose tinted glasses. He has spared no one who he believes is guilty of committing crimes against the Nation. It is a passionate book that ends on an optimistic note.

It is the saga of riots that had spread much before the partition of India. There were murders, rapes, abductions, looting, and arson, and the government machinery miserably failed to control it. The law and order had gone haywire. The novel is mainly the story of three young boys who had lost their entire family during the riots. One of them though, academically brilliant and career wise, reached a coveted position but could not adjust with the unfamiliar ambience and was a social misfit and a failure in life. The other two, through their sheer grit, made a mark in their life and bravely faced all the odds and obstacles in an alien milieu. The novel is full of pathos, events, drama, romance, and typical Punjabi sense of humor. The book advocates against religious bigotry without being didactic, because of which mankind is suffering till date. It is a great subject for a movie.

Love Is The Ultimate Winner

This landmark book shows how the old model of corporate sustainability and responsibility is being replaced by a second generation movement that goes beyond the outmoded approach of CSR as philanthropy or public relations concern to a more authentic, stakeholder-driven model. The author describes the new concept and mission of the new movement and explains its agenda in a succinct guide that will be useful for CSR professionals, including managers, consultants, academics, and non-governmental organizations.

Tinnitus ("ringing in the ears") is a serious health condition that can negatively affect a patient's quality of life. Although there is presently no way to cure tinnitus, there are some good, well-established methods that can significantly reduce the burden of tinnitus. Importantly, the only way to success is to understand the detailed knowledge offered by clinicians and researchers. Based on these concepts, the book incorporates updated

developments as well as future perspectives in the ever-expanding field of tinnitus. This book can also serve as a reference for persons involved in this field whether they are clinicians, researchers, or patients. Once we've integrated the views of various disciplines and treatment options, we can go forth to manage tinnitus well.

Traditional Medicine of Herbal Animal and Mineral Origin in Pakistan

The drugs of herbal, herbo-mineral and animal origin have been used by the traditional healers to maintain health and treat diseases since the dawn of civilization. This book contains chapters on Good Laboratory Practices (GLP) and Good Manufacturing Practices (GMP) of traditional medicines.

Ayurvedic medicine (also called Ayurveda) is one of the world's oldest medical systems. It originated in India and has evolved there over thousands of years. It is a holistic healing science. Ayurvedic practice involves the use of medications that typically contain herbs, metals, minerals, or other materials. Now-a-days people are attracted more towards Ayurvedic medicines as the allopathic medicines are costlier and have side effects. There is more and more scientific research being conducted in our country for treatment of various diseases by Ayurvedic and herbal therapy. Research on medicinal and cosmetic uses of herbs is contributing to the growth of herbal industry. A large number of ailments have Ayurvedic treatment much superior to the other system of medicines and this has been recognized world over. Medicine has become an increasingly accepted alternative medical treatment in America during the last two decades. Up to

80% of people in India use either Ayurveda or other traditional medicines. It is believed that building a healthy metabolic system, attaining good digestion and proper excretion leads to vitality. India is said to have advantage of well recorded and well practiced knowledge of traditional herbal medicines. Herbal products are in huge demand in the developed world for health care, for the reason that they are efficient, safe and have lesser side effects. Efforts have been made on

this book to enable readers to explore details regarding medicinal plants and their processing, learn about the unique composition of Rooh Afza, a clinical study of Chyavanaprash produced by Ayurveda rasashala, a clinical assessment of effect of triphala mlipoma, formulae and processes of different types of Ayurvedic Medicines like churn, capsules, syrup, sharbat, pastes etc that are used in various ailments. It also highlights preparation and uses of every product accompanied with their formulations which offers relief from a variety of conditions, such as cold and flu symptoms, headaches, toothaches, sore throats, high cholesterol, vision problems, anxiety, depression etc. Special content on machinery equipment photographs along with supplier details has also been included.

Present study was conducted to determine the concentration of heavy metals from compound herbal drugs such as Dawa-ul-Misk Moatadil Jawahir Dar, Laboob-e-Kabeer, Majoon Dabeed-ul-Ward and Majoon Flasfa manufactured by national herbal products companies Ajmal Dawa Khana, Hamdard Laboratories and Qarshi Laboratories. Heavy metals such as Chromium

were determined by using Atomic Absorption Spectrophotometer. The literature showed that concentration of heavy metals in different plants is always unpredictable and greatly varied. These variations might be due to contaminated soil, ill storage conditions of the raw material as well as contamination during any step of production. As determination of heavy me

detailed study is proposed to detect heavy metals from all the market available compound herbal drugs before use.
