The national bestselling author of *The Sword*, *The Ring* and *The Chalice* returns the royal court intrigue, the castle secrets, and the crown scandals of her acclaimed trilogy. The throne was her destiny, until Princess Pheresa lost her groom, Mandria's heir, to the dark magic that consumed him. Now Pheresa's fate is uncertain, even when the great King Verence names her Princess Royal, because the title comes with one condition: She must take Lervan, a man of acceptable birth and rank, as her husband. Reluctantly, she agrees. Then, without warning, the old king dies. And Pheresa succeeds to the throne. But all is not well. Many fear that Pheresa has been weakened by the evil magic. Her enemies are strong. Her husband plots against her. And her only ally is the last man she would ever choose—and the one man she should never love.

Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-

vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Welcome to the Seventh Terrace of Dante's tower of Purgatory. Here, in darkness lit only by a wall of flame, we find souls enslaved by the sin of lust. Lust is a great and terrible thing, and this collection of dark tales follows a mere handful of the many paths leading to the wall of fire.

An illustrated history of motorcycling traces the development of motorcycles over the past decades and presents important facts, figures, and notable feats

Motocross Racers

For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an

Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken. Enduro motorcycles are used in races where the rider needs to keep a steady pace through many checkpoints, often over very rough terrain. Students will find out how the construction and technology of an enduro motorcycle helps it complete these races.

Skateboard stickers have always been highly collectable, and this will be the first book to bring together some of the most popular stickers, both classic and new. At a time when skateboarding has already established itself in the mainstream, and is now coming back into the 'cool', the book will have massive appeal, combining a nostalgic 'revival' element appealing to the older generation of skaters, while also having a big appeal to current younger skateboard enthusiasts. The book will also have global appeal due to the widespread popularity of skateboarding culture. The book will feature stickers from the following brands: Alien Workshop, REAL, Toy Machine, Girl, and Santa Cruz. Approximately 30 stickers will be included from each brand.

First published in 1979 as the "Moto-X Fox Guide to Preparing the Yamaha YZ and IT for Competition," this 64-page book was written and photographed by famed 1970's Cycle News editor, racer and motocross journalist Jim "Jimmy the Greek" Gianatsis. It covers the development and racing history of the Yamaha 2-stroke and 4-stroke motocross and enduro bikes from the DT models raced by the Don Jones family in the early 1970s, through to the exotic YZ, OW and TT-500 machines raced by Hakan Andersson, Pierre Karsmakers and Bob "Hurricane" Hannah up to 1979. Included is race bike preparation information from famed Yamaha factory rider Bob Hannah, his mechanic Keith McCarty, the top privateer Moto-X Fox Racing Team, as well as privateer mechanic Bevo Forte. There is also a section on IT model enduro bike preparation by Yamaha motocross and ISDT rider Chris Carter. Included is "Riding with the Hurricane" an eight chapter racing instruction guide with photos that Jim produced with Bob Hannah that was originally printed in Cycle News as a weekly series in 1978. Preparing the Yamaha YZ and IT for Competition is a classic dirt bike technical, tuning and riding manual that has been out of print and unavailable for 30 years. It serves as very interesting reading and a great historical reference guide for dirt bike fans both young and old. Many of the bike preparation and riding tips are still relevant today. A must have for any dirt bike enthusiast or collector.

Clean up on aisle 4! Have you ever been in a moment where you spilled something out of your mouth and it's all over the place and now you can't call it back? Yes! Clean up on Aisle 4! This read will cause you to first, take a hold of your thoughts, and second, cause you to taste your words before you serve them to someone else. Angella's personable experiences, from childhood to now, with words spoken to her or about her have put her in the seat with pen and paper to write. There are many challenges she faced: loss of parents, crippling disease, and

more. Through her writing, you can take a ride down the path and hear the experiences of the hills and valleys that could have caused many words to be released from her, but with the help of the Holy Spirit, she chose a different course of action. Take a read and set your heart, mind, and mouth...and PLEASE BE CAREFUL WHAT YOU SAY! My prayer for every reader is to have a moment where their brain and senses come alive to the knowledge of the fact that our words carry weight.

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--
