Understanding Primary Education will help trainees and newly qualified teachers reflect on the professional decisions they need to make within their planning and classroom practice. The authors analyse key issues and policies within contemporary education through reference to research and pedagogical practice. They encourage readers to reflect on policy and practice and support them in articulating their own beliefs and values. A broad perspective of the curriculum is outlined with a focus on what curriculum breadth and balance looks like in practice. Readers are encouraged to consider questions such as: What are the purposes of education? What values are important in a pluralist society and what values might we share? In what ways can children be encouraged to be active participants within their communities?

Specifically designed for busy teachers who have responsibility for co-ordinating English within their primary school, this concise and practical volume provides a wealth of tips, case studies and photocopiable materials.

The government is now training around 6000 deputy heads per year towards a new qualification: the National Professional Qualification for Headship (NPQH).

A journey into one of the most fascinating minds alive today—guided by the owner himself. Bestselling author Daniel Tammet (Thinking in Numbers) is virtually unique among people who have severe autistic disorders in that he is capable of living a fully independent life and able to explain what is happening inside his head. He sees numbers as shapes, colors, and textures, and he can perform extraordinary calculations in his head. He can learn to speak new languages fluently, from scratch, in a week. In 2004, he memorized and recited more than 22,000 digits of pi, setting a record. He has savant syndrome, an extremely rare condition that gives him the most unimaginable mental powers, much like those portrayed by Dustin Hoffman in the film Rain Man. Fascinating and inspiring, Born on a Blue Day explores what it's like to be special and gives us an insight into what makes us all human—our minds.
