This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

'When an owner stood by his Triumph Stag, it was usually because he couldn't get the door open.' 'The Niki demonstrated every handling vice known to suspension engineers, plus some invented especially for this car.' 'If you needed a sudden burst of acceleration in the Goggomobil Dart, it was best to jump out and run.' It's true that cars are getting better and better. But sometimes, despite the designer's best intentions, instead of a peach we get a lemon. And while car enthusiasts (WHEELS magazine has a circulator about 65,000 copies) will argue endlessly about what are the best cars, they'll argue even more ferociously about what are the WORST. LEMON! is a catalogue of 60 courageous disasters, from the 1958 Ford Edsel (by the 1960s 'edsel' was used in the US as a byword for failure, and the 23rd edition of the Webster Dictionary made it official) to the much-loved travesty, the P76 (when people took P76s in for warranty work they carried lists of the things that didn't need fixing). Bad design, appalling execution, ridiculous pretensions, ludicrous names- this detailed and hilarious look at automotive atrocities from the 1950s to the 1990s is a motoring Hall of Shame. Great photographs from car manufacturers' 'NEVER AGAIN!' Photo Archives will make this book impossible to resist. There are also plenty of top ten lists (top ten worst designs: top ten worst for handling etc) for those who suffer from list mania. The perfect Father's Day gift, LEMON! will also make a great stocking filler at Christmas. From Alfa to Zeta, from the tiny to the big, and from the endearingly incompetent to the bombastically stupid, LEMON! will leave you not only laughing, but wondering how so many car makers got away with so much for so long.

Ever since their introduction in 1972, the S-Class saloons from Mercedes-Benz have been considered the pinnacle of automotive excellence. For most of that time, ownership of an S-Class - at least, of a reasonably recent one - has been symbolic of material success and of restrained yet impeccable good taste. Several other car makers have nibbled at the edges of the S-Class market, but none has produced a viable and lasting alternative to the big Benz. Mercedes-Benz S-Class 1972-2013 charts the evolution and success of the series, from the W116 model, the first to be designed from the ground up as a large luxury saloon, through to the C126 coupe, one of the all-time Mercedes-Benz classic designs.Topics covered include: development and production of the W126 saloons and classic W126 coupes; the W140 saloons in the 1990s; the 140 coupes, the W220 models and the elegant 215 coupes; the W221 models, introduced at the Frankfurt International Motor Show in 2005; the C216 coupes and the future of Mercedes-Benz S-Class. Superbly illustrated with 288 colour photographs.
